Future Code Club is a nonprofit initiative dedicated to providing teens between ages 9 to 18 years access to computer programming skills through hour of code, after-school and weekend programs.

We believe that digital skills are tools of empowerment, and our curriculum inspires the next generation to get excited about computing and digital making. The world is changing, and we want young people to be ready.

We’re here to make sure that all young girls, boys and children with disabilities have access to the knowledge they need to prosper in the digital world.
Mission:
To expose all teens in Uganda to computer science concepts through interactive activities that enable them to build their own games, animations, mobile apps and websites.

Introduce code clubs in at least 100 schools in Uganda within a period by 2021.

Vision:
To equip every teen with skills, confidence and opportunity to harness the power of technology to achieve economic and personal fulfillment in shaping their world.

Inspiring teens to code and get creative with technology.
This is an after school one hour coding program that is fun and interactive. Every child will have the opportunity to learn computer science skills which help nurture problem-solving skills, logic, and creativity.

Weekend Code Club

Weekend code club is a fun packed weekend coding program. Teens engage in a fun tech day experience that exposes them to creative and interactive ways to learn digital skills.

Hour of Code

This is a National movement by Future Code Club reaching 12,000 students across the nation through a one-hour introduction to computer science and computer programming.

Teacher Code Workshops

We believe all teachers can teach coding. Teacher Code Workshops are designed to help teachers and volunteers with little-to-no coding experience teach coding fundamentals with confidence!
This is a code club van moving across the country and bringing hands-on, interactive technology education and learning opportunities to all regions of the country.

It is our mission to ensure that all Ugandan’s particularly young girls, boys and children with disabilities are exposed to the learning opportunities that the code club has to offer.
